

## Japan Airlines Moves to the Cloud

### **Japan Airlines sees monthly cost savings and increased reliability**

With their current phone system reaching the end of life, Japan Airlines was looking for a new communications solution at their Boston Logan International Airport location.

With a strong dedication to their employees and customer service, it was imperative that a new communication solution not only met their functionality but exceed it.

**ENGINEERS SOLVING YOUR TECHNOLOGY CHALLENGES**

## We're with you Start to Finish

Working with intlx Solutions, Japan Airlines was able to migrate to a cloud voice solution that provided:

- Geo-redundant cloud presence
- Superior call quality
- Customized call routing announcements in multiple languages
- Savings of **\$1000** per month
- Ongoing support from a company who cares

At intlx Solutions, we handle the entire process of migrating to the cloud from start to finish.

*"I can't believe the call quality and how easy the migration was!" - Japan Airlines IT Manager*
