intlx Solutions Partners with Nile to Deliver Leading Network Solutions

Canton, MA, September 16, 2024 - intlx Solutions, a leading provider of advanced unified communications solutions, is proud to announce a partnership with Nile, an AI-powered networking company that provides cloud native networking. This collaboration brings together two industry leaders to deliver innovative and reliable network solutions to customers worldwide.

By combining intlx Solutions' deep technical expertise with Nile Secure's cybersecurity expertise, the partnership aims to address the evolving needs of businesses seeking to modernize their network infrastructure. Together, they will offer a comprehensive suite of solutions that deliver the features, reliability, and security that customers demand but often find lacking in legacy network technologies.

"We are thrilled to partner with Nile Secure," said Kenny Pearl, President at intlx Solutions. "Their commitment to charting a path for a true next generation cloud native architecture aligns perfectly with our focus on providing innovative solutions for our customers. Rooted in making network technology work better for customers, they rebuilt how we think about network connectivity and provide a truly unique solution and perspective that is most welcome in this space. By joining forces, we can offer our customers a more robust, optimized in real time, secure network infrastructure that empowers them to achieve their business goals, and focus on their customers."

The partnership will focus on developing and delivering a range of network solutions, including:

- **Next-generation network infrastructure:** providing customers with advanced network architectures and eliminating the need to worry about network refreshes and complicated network architectures
- **Enhanced security:** implementing robust zero trust measures to protect against emerging threats and ensure data privacy
- **Scalability and flexibility:** offering solutions that can adapt to changing business needs and grow with the organization
