## intlx Solutions introduces Alarmtraq Partner Edition

CANTON, MA, October 11, 2024 - intlx Solutions, a leading company founded by engineers focused on providing best-in-class IT support to their customers, announced their new product offering Alarmtraq Partner Edition.

Our new offering is an evolution of the Alarmtraq product acquired from Reilly Telecom in 2023 by intlx Solutions. With Alarmtraq Partner Edition, our MSP customers will receive new capabilities not available in Alarmtraq release 11 (Alarmtraq Legacy Standalone Edition). Some of these exciting new features include a bundled API which was previously a separate product, the updated intlx Solutions Agateway software to collect alerts with support for SNMP v3, full support for Avaya Aura Release 10.x, enhanced onboarding functionality via an onboarding importer, and a host of other new features.

Alarmtraq Partner Edition is a product geared towards customers who need a tenanted platform to support monitoring and alerting of devices across multiple end customer locations and devices. A full list of enhancements is available [here](#). Available for purchase on 12/1/2024, Alarmtraq Partner Edition introduces a new subscription only model and is an entirely new product offering from all prior editions of Alarmtraq.

intlx Solutions' President, Kenny Pearl stated, "With the release of Alarmtraq Partner Edition we continue to deliver award-winning solutions to our customers that help them deliver services to their end customers. Alarmtraq Partner Edition stands as a great accomplishment by our DevOps team led by Jeremy Boilard. We are very proud of this new product and even more excited about the [roadmap](#) and things to come."
